

The Center for Disease Control (CDC) estimates that 22 million workers are exposed to potentially damaging noise at work each year. However, hearing loss is preventable!

Here are some signs that noise may be a problem in your workplace:

- If you hear ringing or humming in your ears when you leave work.
- If you have to shout to be heard by a coworker an arm's length away.
- If you experience temporary hearing loss when leaving work.

**MAKE SURE YOUR WORKERS ARE PROTECTED WITH PROPER EAR PROTECTION FROM LINC SYSTEMS IF THERE IS DAMAGING NOISE IN YOUR WORKPLACE.**
