**Texwrap 2011**  
Continuous Motion Side  
Seal Shrink Wrapping System

**SAP#01144CSS2011R**  
**Serial # S-MTX24009**

**LINC ID # 641**  
**MFG # CSS-2011R**

The CSS Series “box-motion” style wrappers are among Texwrap’s most popular machines, valued for their speed, versatility, and reliability. The horizontally moving end seal travels with the product during sealing, then raises and returns to position for the next cycle once the seal is complete. A servo-driven seal allows operators to precisely control dwell time and seal pressure directly from the touchscreen.

The CSS-2011 utilizes Texwrap’s patented hybrid pneumatic cam system, enabling rapid carriage movement to seal and separate packages without the harsh starts and stops found in competitive systems. Texwrap’s exclusive Motion Trim™ technology further minimizes end-seal motion electronically, ensuring maximum throughput, long-term reliability, and minimal maintenance.

This system is configured with a single-chamber shrink tunnel featuring a 13" H x 22" W opening, a stainless-steel wire belt, and a closing exit conveyor, delivering consistent, high-quality shrink performance in a compact, efficient footprint.

## **Specifications:**

- Maximum Package Size: Both Height & Width cannot be at maximum dimension: 10" Height X 20" Width X Infinite Length
- Film Width: Maximum: 32" Center folded Optional: 64" Single wound
- Conveyor Speed: Up to 100 feet per minute
- Typical Footprint: Does not include door clearance, swivel arm position, or other options: 135" Length x 71" Width
- Construction: Heavy-duty welded tubular steel standard; optional corrosion resistant design for wipe down environments
- Orientation: Right or Left-hand configuration available
- Country of Origin: Designed and manufactured in the USA
- Power: 240VAC/1PHZ
